### Curriculum

### Subject: MATH

### Grade-III (2025-26)

### Recommended Books– MATHS ZEST

Topic	Sub-topic	Curricular Goals	Competencies	Learning outcomes	Methodology	Months	Evaluation
<b>DIVISION</b>	1.Equal grouping and equal sharing	CG-1 Understand numbers and carries out the four basic operation with whole number and discover and recognize dividend, divisor, quotient and remainder.	C1.3- Understand and visualizes arithmetic operation and the relationship among them, apply the four basic operations on whole number to solve daily life problem.	<b>To enable students to</b>  <b>Understand</b> the equal sharing and equal grouping. Repeated subtraction, division facts	<b>Group Discussion</b> with understanding  <b>Students will understand equal sharing and equal grouping by dividing 12 pencils equally among 4 students and by making group of 3 pencils in each group.</b>	October	Class test
	2. Division as repeated subtraction  3.Division facts and by 10, 100 and 1000.  4.Relation between .Division & multiplication  5.Divide by 1 and 2 digit number and check	CG-4 Develops problem solving skills and developing computational thinking	C4.1- Solve puzzles and daily life problems involving one or more operations on whole number including word puzzle	Analyse and create the relationship between multiplication and division.  To enable the students to understand division by 1 and 2 digit number and check .	<b>Students will understand relationship between multiplication and division activity method using art.</b>		IA2  Final term exam  worksheet

	<p>6. Developing table of 2 digit number till 25.</p> <p>7 Application of Division in daily life</p> <p>8. Mental math of division.'</p>		<p>C-4.3- Select appropriate method for computing with whole number such as mental computation or paper pencil calculation.</p>	<p>To apply the concept in real life to solve daily life problems.</p> <p>To be able to apply the concept of division to solve mental math using critical thinking.</p>	<p><b>Using concrete objects</b></p> <p><b>By board and discussion method, visualization</b></p> <p><b>Smart board and notebook</b></p> <p><b>Audio -visual aid.</b></p>

Topic	Sub-topic	Curricular Goals	Competencies	Learning outcomes	Methodology	Months	Evaluation
FRACTION	1 Concept of fraction Visualization by drawing figures and writing fraction	CG-1 Understand numbers and represent whole number using the Indian place value system, understand and carries out the four basics operations with whole numbers.	C1.2-Represent and compares fractions in daily life as part of whole.	<b>To enable students to</b>  <b>Understand concept of fraction , writing fraction number name and in figure</b>	Students will made understand one half, one third, one fourth by paper folding activity of origami sheets.	October and november	Class test
	2. Concept of numerator & denominator			<b>To be able to understand numerator and denominator of a fraction .</b>	Concept of numerator and denominator and number name of fraction using audio - visual aid and by note book practice		IA2
	3. Concept of writing fraction in word.						Final term exam
	4. Types of fraction			<b>To be able to recognize different type of fractions.</b>	Students will made understand types of fraction and equivalent fraction using <b>art integration method</b> , audio visual aid and notebook practice		
	5. Fraction of shaded and unshaded parts.			<b>To be able to understand type of fraction, fraction of shaded and unshaded parts using art.</b>	Concept of shaded and unshaded part by coloring few parts of given figure and write their fraction of shaded and unshaded parts also using audio-visual aid.		
	6. Comparison and ordering of like fractions			<b>To be able to analyze and compare like fraction.</b>	Students will made understand comparison of like fraction by colouring parts equal to numerator of two rectangle divided into strips of equal size.		

	7.Additions and subtraction of like fractions			<b>To be able to perform addition and subtraction operation on like fraction.</b>	Students will made understand addition and subtraction of like fraction by colouring activity.		
	8. Concept of “of”			<b>To be able to perform “of” concept in fraction.</b>	Students will draw 12 objects and then divide into group of 2, group of 3 and group of 4. Colour them according to one half, one third or one fourth.		
	9. story sums and mental math	CG-4 Develops problem solving skill to solve mathematical puzzle as well as daily life problem and developing computational thinking.	C-4.1 Solve puzzles and daily life problems involving one or more operations on whole number including word puzzle	<b>To be able to apply fraction concept in real life.</b>  <b>To able to sole mental math of fraction.</b>	By giving real life example and facilitate them to create word problem themselves		

Topic	Sub-topic	Curricular Goals	Competencies	Learning outcomes	Methodology	Months	Evaluation
MEASUREMENT	1. Concept of length, weight and capacity	CG-3 Understands measurable attributes of objects and the units, systems and process of such measurement, including those related to distance, length, weight using standard units.	C3.2 -Uses an appropriate unit and tool for the attribute being measured.  C-3.3-Carries out simple unit conversions within a system of measurement.	To enable students to  Understand concept of length, weight and capacity and their unit.  To enable the students to understand estimation of cm, m, km in weight estimation of g and kg in capacity estimation of l and ml.	Students will make estimation of different unit of length, weight and capacity using metre scale, weighing machine and jars of different capacity.	November	Class test  Final term exam  worksheet
	2. Conversion of bigger unit to smaller unit	CG-4 Develops problem solving skill to solve mathematical puzzle as well as daily life problem and developing computational thinking.	C- 3.5- Devises strategies for estimating the distance, length, weight and volume and verifies the same using standard unit.	To enable them to convert bigger unit to smaller unit.  To enable them to perform addition, subtraction and multiplication on measurement.	Students will draw circle of 1L disc into two 500ml parts and four 250ml parts to understand relation between l and ml.		
	3. Addition, subtraction and multiplication on measurement		C-3.7- Solve daily life problem related using length, weight and volume	To apply the concept of measurement in real life.  To enable the students to solve mental math using critical thinking.	Teacher will demonstrate and then facilitate them to perform different operation on measurement.		

	4. Story sums on measurement		C-4.3 Select appropriate method and tool for mental computation and estimation.		To facilitate students to apply the concept of measurement in real life by giving them real life example.  Using concrete objects  By example method  Smart board and note book  By board and discussion method		
	5.Mental math on measurement						

Topic	Sub-topic	Curricular Goals	Competencies	Learning outcomes	Methodology	Months	Evaluation					
TIME	1. concept of time	CG-3 Understands measurable attributes of objects and the units, systems and process of such measurement, including those related to distance, length, weight ,volume and time using standard units.	C3.2 -Uses an appropriate unit and tool for the attribute being measured.	<b>To enable students to</b>  <b>Understand reading and drawing of clock showing quarter past, half past ,quarter to and time upto 5 minutes.</b>	<b>Students will draw clock and colour parts to show quarter past, half past and quarter to time.</b>	JULY	Class test					
	2. Drawing of clock showing, quarter past, half past quarter to and time upto 5 minutes.						C-3.3-Carries out simple unit conversions within a system of measurement.	To enable them to understand conversion of different unit of time.	<b>Students will made understand the reading of clock using real clock.</b>	Worksheet		
	3. reading of clock									C-4.1 Solve puzzles and daily life problems including word puzzle	To be able to find the before and after time.	Peer checking
	4. conversion of different unit of time	CG-4 Develops problem solving skill to solve mathematical puzzle as well as daily life problem and developing computational thinking.	C-4.3 Select appropriate method for computing mental math	To be able to understand the concept of a.m and p.m	To apply concept of time in daily life and enable them to use critical thinking to solve the mental math.							Teacher will demonstrate and then facilitate them to do conversion of different unit of time
	5. before and after time concept											
	6. a.m and p.m											

	7. Word problem and mental math			.	<b>a.m and p.m using number line.</b>  To facilitate students to apply the concept of time in real life by giving them real life example.  <b>Using concrete objects</b>  <b>By example method</b>  <b>Smart board and note book</b>  <b>By board and discussion method</b>		
--	---------------------------------	--	--	---	---	--	--

Topic	Sub-topic	Curricular Goals	Competencies	Learning outcomes	Methodology	Months	Evaluation
<b>DATA HANDLING</b>	1. Concept of data handling	CG-4 Develops problem solving skill to solve mathematical puzzle as well as daily life problem and developing computational thinking.	C-4.3 Select appropriate method for computing with whole number such as mental math, estimation.	<b>To enable students to</b>	<b>Group Discussion</b>  Teacher will demonstrate and then facilitate them to understand concept of tally marks, bar graph and pictograph.  <b>Using concrete objects</b>  <b>By example method</b>  <b>Smart board and note book</b>  <b>By board and discussion method</b>	JANUARY	Class test
	2. tally marks			<b>Understand analyze and organize data</b>			Worksheet
	3. Reading and drawing of pictograph			<b>analyze the data and represent it in tabular form in tally marks.</b>			Peer checking
	4. reading of bar graph			<b>To arrange the data using picture and key in pictograph .</b>			Half yearly exam
	5. mental math of data handling			<b>To enable them to understand reading of bargraph.</b>  <b>To enable them to understand mental math of data handling.</b>

## Cambridge International School

### Final Term Curriculum

### Subject: Social Science

### Grade-III (2025-26)

#### Recommended Books– Time Tales Social Studies

Topic	Sub-topic	Curricular Goals	Competencies	Learning outcomes	Methodology	Month	Evaluation
Ch – 20 Early humans	Introduction of early life  Invention of tools  Beginning of farming  Early settlements  Invention of wheel	CG – 5 Uses data and information from various sources to investigate questions related to their immediate environment	C 5.1 performs simple inquiry related to specific questions independently or in groups.  C 5.2 presents observation and findings through different creative modes of (drawing, diagram, poem, play, skit, oral and written expression)	The learner will be able to:  explain how early humans lived as hunters using illustrations.  evaluate the impact that the use of fire had on early humans.  access how the beginning of farming changed the lives of early humans.  learn collaboration and teamwork from early humans.	Group Discussion with understanding  Smart board  Visual explanation  <b>PPT</b>  <b>Discussion on Invention of wheel and fire</b>	October	Internal assessment - 2  Final Term  Worksheet
Ch -13 Festivals of India	Introduction  National festivals  Religious festivals	CG-1 Explores and engages with the natural and socio-cultural environment in their surroundings. CG-5 Uses data and information from various sources to	<u>C-1.1 Describes the relationship between humans and nature and traditions in the family and community.</u>  CG-5.1 Performs simple inquiry related to specific	The learners will be able to:  Learn about the three national festivals of India.  Understand the significance of the festivals celebrated by people of different religions.	Group Discussion with understanding  Smart board  Visual explanation  Flowchart	October	Internal assessment-2 Final Term  Worksheet

	Harvest festivals  Other festivals	investigate questions related to their immediate environment.	questions independently or in groups.  C.G 5.2 Presents observation and findings through different creative modes like drawing, diagrams and expressions	Know about the popular harvest festivals of India.	Stories related to different festivals		
Ch- 14 Means of transport	Introduction  Different means of transport  Land transport  Water transport  Air transport .	CG-5 Uses data and information from various sources to investigate questions related to their immediate environment.	C5.1- performs simple inquiry related to specific questions independently or in groups. .C5.2- presents observation and findings through different creative modes (drawing, diagram, poem, play, skit, oral and written expression)	The learner-  will recall the different means of transport used by them in day to day life.  identify the different means of transport used in modern times namely land, air and water.  understand the need for road safety and recall the norms while walking on the road.	Group Discussion with understanding  Smart board  Visual explanation  Flow chart of different means of transport  Riddles	November	Final Term  Worksheet
Ch – 3 Physical features of India	Introduction  Northern Mountains  Northern plains  Peninsular plateau	CG -1 Explores and engages with the natural and socio-cultural environment in their surroundings  CG-4 Develops the ability to read and interpret simple maps	C1.1Describe relationships (Including between humans and animals/nature) and traditions (art forms, celebrations, festivals) in the family and community.  C4.3 Reads simple maps of city, state and country	The learner be able to:  Understand the different landforms of India  Know about what is special about each landforms.  Recognize the regions along with their features	Group Discussion with understanding  Smart board  Map  Visual explanation  Flowchart	November	Final Term  Worksheet

	Great Indian Desert  Coastal plains and islands	CG-5 Uses data and information from various sources to investigate questions related to their immediate environment	to identify natural and human made features.  C5.2 Presents observation and findings through different creative modes.				
Ch –11 Our Clothes	Introduction  Clothes we wear  Clothes according to regions  Clothes of women and men  Clothes in different seasons  Special Clothes and uniform	CG-5 Uses data and information from various sources to investigate questions related to their immediate environment.	C-5.1 Performs simple inquiry related to specific questions independently or in groups.  C 5.2 Presents observation and findings through different creative modes (drawing, diagram, poem, play, skit, oral and written expression)	The learner will be able to:  Describe the clothes worn by people in different parts of our country.  Learn the use of different fabrics according to the season  Explore about the special clothes worn on special occasions	Group Discussion with understanding  Smart board  Visual explanation  Flowchart	Decem ber	Final Term  Worksheet
Ch – 12 Dances and music of India	Introduction  Classical dance forms of India  Folk dance forms of India  Music of India	CG-1Explores and engages with the natural and socio-cultural environment in their surroundings.  CG.5 Uses data and information from various sources to investigate questions related to their	C-1.1 Describes relationship with between humans and animals and traditions (art forms, celebrations and festivals)  C.G 5.2 Presents observation and findings through different creative modes (drawing, play ,oral and written expressions).	The learners will be able to:  List the various traditional and Folk dance forms of India  Appraise Classical and Folk music and various musical instruments	Group Discussion with understanding  Smart board  Role play  Visual explanation  Flowchart	Decem ber	Final Term  Worksheet

		immediate environment					
Ch –7 and 8 Kolkata and Chennai	Introduction  Location and climate  Culture and traditions  Transport  Places of tourist attractions  Industries and Government offices	CG-4 Develops the ability to read and interpret simple maps.  CG-5 Uses data and information from various sources to investigate questions related to their immediate environment.	C-4.3 Reads simple maps of city, state and country to identify natural and humanmade features with reference to symbols and directions  C-5.1 Performs simple inquiry related to specific questions independently or in groups.  C5.2:Presents observations and findings through different creative modes.	The learners will be able to:  Analyse the climate, history, places of interest and people of the cities  Outline the culture of the cities.	Group Discussion with understanding  Smart board  Visual explanation  Flowchart  PPT  Comparative table	Decem ber	Final Term  Worksheet
Ch – 4 States of India	Introduction  States and union territories  Government	CG- 4 develops the ability to read and interpret simple maps.	C-4.3 Reads map of city, state and country to identify natural and humanmade features with reference to symbols and directions.	The learners will be able to:  Know about the names of states  Importance of role of government	Group Discussion with understanding  Smart board  Visual explanation Flowchart	January	Final term  Worksheet
Ch – Sources of history	Introduction  What is history?  Periods in history  Sources of history  Importance of history	CG – 5 Uses data and information from various sources to investigate questions related to their immediate environment.	C5.1 – performs simple enquiry related to specific questions independently or in groups  C5.2- presents observation and findings through different creative modes (drawing, diagram, poem, play, skit, oral and written expression)	The learners will be able to:  Analysis the role of understanding history  Know about the different periods of history	Group Discussion with understanding  Smart board  Visual explanation	January	Subject enrichment activity
